## Reference Centre on Flood Management

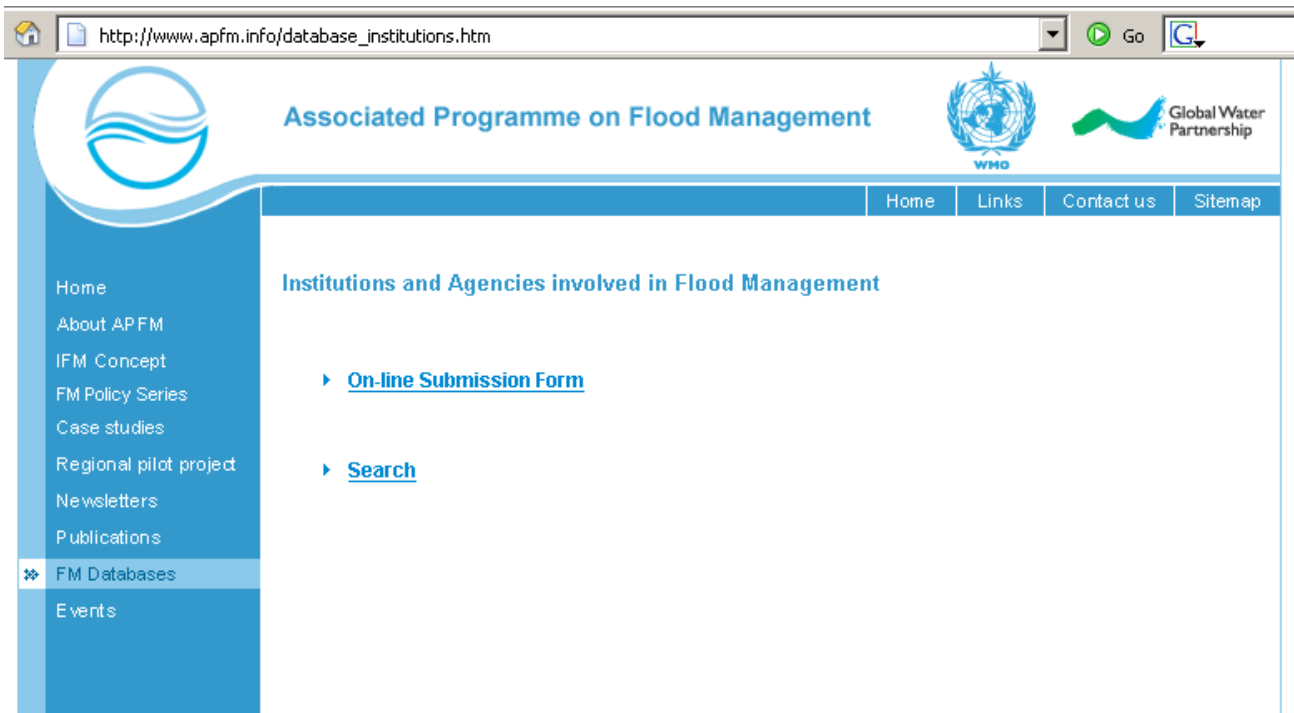

The Reference Centre on Flood Management is a set of interactive databases accessible through the APFM web site as below. Through the Reference Centre, APFM provides access to a wide range of information for flood prone countries and communities as well as the institutional research and donor communities in their effort to address flood management issues. The Reference Centre is based on contributions from various institutions and individuals active in flood management.

**NOTE: The Reference Centre depends on continued inputs from the flood management community. Please share your flood management information through the respective "Online submission form", available when entering one of the databases below.**

The Reference Centre provides access to information in the following categories:

- ▶ **Institutions and Agencies involved in Flood Management**  
Serves as a tool to facilitate communication and cooperation between various agencies and institutions across the world that are involved in flood management.
- ▶ **Flood-Prone Areas**  
Characterizes flood-prone areas in various parts of the world in order to serve as a tool for priority setting to the international community.
- ▶ **Flood Management Policy and Legislation**  
Provides flood-related policies, laws and regulations as a reference for policy makers, legal experts, researchers and executive functionaries in land and water management to support their efforts in introducing laws and regulations as a vehicle for change towards IFM.
- ▶ **Literature on Flood Management**  
Provides literature relating to the various aspects of flood management and as such to serve as reference centre for a wide range of policy makers, planners researchers, executive functionaries in land and water management, NGO's, the media and the affected public.

By clicking on the respective Database name, each one can either be searched for entries, or entries can be added to the database, as shown below for the database on “Institutions and Agencies involved in Flood Management”.

**Before submitting information, please check through the “Search” button in order to have the overview of the information already available for the countries for which you wish to contribute something . Please submit as much information as possible for your country of origin or professional activity, and this for the four databases.**

If the link “On-line Submission Form” is clicked, the following form appears.
